

Dear Data

Lesson 6 - Evaluation

Peer data checkup

You are going to swap visualisations with another student and check that it translates back to the data correctly

Task One:

- Fill in the questions from your homework in the box on the sheet
- Identify 5 pieces of data on your visualisation to be used in the evaluation

Task Two:

- Swap work with the person sitting next to you
- Use the key to complete the box with the data represented in the visualisation
- Compare the answers to check that they came out correctly

Is there something that stands out

- Visualisations make it easy to see if there are patterns in the data that will help us answer the question posed back in lesson two.

Task Three

- Is there something interesting in your visualisation?
 - A group of similar data
 - A perfect spread of data
 - A repeating pattern of data
- Can you work out what that pattern means (you drink energy juice at weekends every Saturday as there are rugby games ... etc)

If you require this document in an alternative format, such as large print or a coloured background, please contact Claire Sowton, data.schools@ed.ac.uk or Moray House School of Education and Sport, St John's Land, Holyrood Road, Edinburgh, EH8 8AQ
