

LOCKED IN THE DATA BASE

Our computer has automatically activated all the burglar alarms and locked all the doors at headquarters and on each of our **DATA** bases and buildings. It's not been too much of a problem for most places, as we've got the codes to turn off the alarms... except we don't have a log of the alarm code for your building. **Sorry! You appear to be stuck in for now!**

Fortunately, all of the **DATA** Technicians who set up the alarm systems have to leave **code hints** in case of this problem. The Technician who set this alarm code has been a bit cryptic when writing the passcode hint. The six-digit code is based on a series of puzzles.

THE CLUES

The technician is a huge rollercoaster fan, so all the clues are based on theme park data for their favourite parks and rollercoasters.

Headquarters have sent through all the clues and the data they can find on the theme parks and rides that will help you solve the puzzle and escape!

QUESTIONS	ANSWERS
What year was Epcot built?	
How many coasters are at Six Flags Mexico ?	
What is the total capacity of all coasters at Legoland ?	
What is the difference between the ticket prices at the two water parks?	
Which park had the highest attendance in 2016? What is the capacity of that park?	
How many people went to Tropical Islands in 2021?	
What year did Legoland have the same attendance as Six Flags had in 2010?	
What is the total capacity of all the dark rides at Epcot ?	
What is the height of the fastest coaster?	
What is the speed of the longest coaster?	
Add all your answers together to get the six-digit alarm deactivation code:	

The exit code is the sum of all your answers. **Enter the alarm deactivation code:**
