VILLAINOUS VIKINGS

AND THE
AGENTS OF D.A.T.A

COMPETITION

Agents! Can your team create a secret passcode for your DATA base (codename: Your 'Classroom') or a space in your school?

Maybe you can use data that is displayed on the walls or information about your team. You should not use personal data or information that your agents do not want to share with others. Try to use clues based on graphs and charts or maps. Perhaps there is information and facts in books in your DATA base? Maybe you have sensors in your area where you could use the readout for an automatically changing code that's more secure and super secret?!

HOW TO ENTER

Send your secret code puzzles to us at dataschools@ed.ac.uk or tweet us at @data_schools.

Don't forget to tell us your team name, your school and your teacher's name. Every month we will choose one winning team and we'll send them a prize!

This competition is based on the Agents of DATA escape room activity "Locked in the DATA base".

You might want to try that activity first to get some ideas! It's at: **dataschools.education/escape**
