

TOP SECRET BRIEF

New Trainee Agent of DATA

Welcome to the DATA Agency. Congratulations on becoming an Agent of DATA! This is an important job and we only select the best of the best. Your training will help you learn all the skills you will need to protect Scotland against temporal and network attacks.

DATA stands for **Defence Against Temporal Attacks**, and our prime mission is to foil the League of VIKINGS' dastardly plans and prevent them from disrupting the internet and the timeline.

The League of VIKINGS are the: **Villains, Insurgents and Kleptomaniacs: Invading Networks and Global Systems.**

They are a group of scheming individuals who love nothing more than corrupting computers, breaking into databases, spreading fake news and computer viruses, and generally causing computer chaos. Recently they've also been experimenting with time travel, to carry out their evil mischief in the past as well as the present.

It's up to you to stop them! You will work in a team with other new DATA trainee agents. Your team will work from an off-site location, to be known as your DATA base (codename: your 'classroom').

We need your help to decode information your fellow agents have uncovered from the VIKINGS. You will work together to solve problems and puzzles to foil whatever dastardly plans the VIKINGS have concocted. Good luck agents!
