Dear Data

Lesson 6 - Evaluation

Peer data checkup

You are going to swap visualisations with another students and check that it translates back to the data correctly

Task One:

- Fill in the questions from your homework in the box on the sheet
- Identify 5 pieces of data on your visualisation to be used in the evaluation

Task Two:

- Swap work with the person sitting next to you
- Use the key to complete the box with the data represented in the visualisation
- Compare the answers to check that they cam eout correctly

Is there something that stands out

- Visualisations make it easy to see if there are patterns in the data that will help us answer the question posed back in lesson two.

Task Three

- Is there something interesting in your visualisation?

    - A group of similar data

    - A perfect spread of data

    - A repeating pattern of data

- Can you work out what that pattern means (you drink energy juice at weekends every Saturday as there are rugby games … etc)
